Daily remainder  
will be sent to the  
user's register  
mobile number so  
that he can keep  
track of his goods

A web application  
where user can login  
and enter the  
required details  
about the goods  
now he can live  
track the train.

In this idea user only  
get notified if any  
delay in reaching  
the location and  
also when goods  
reached the location
